SYNTHETIC EXAMPLES / MagicCuts instrument research / September 2026

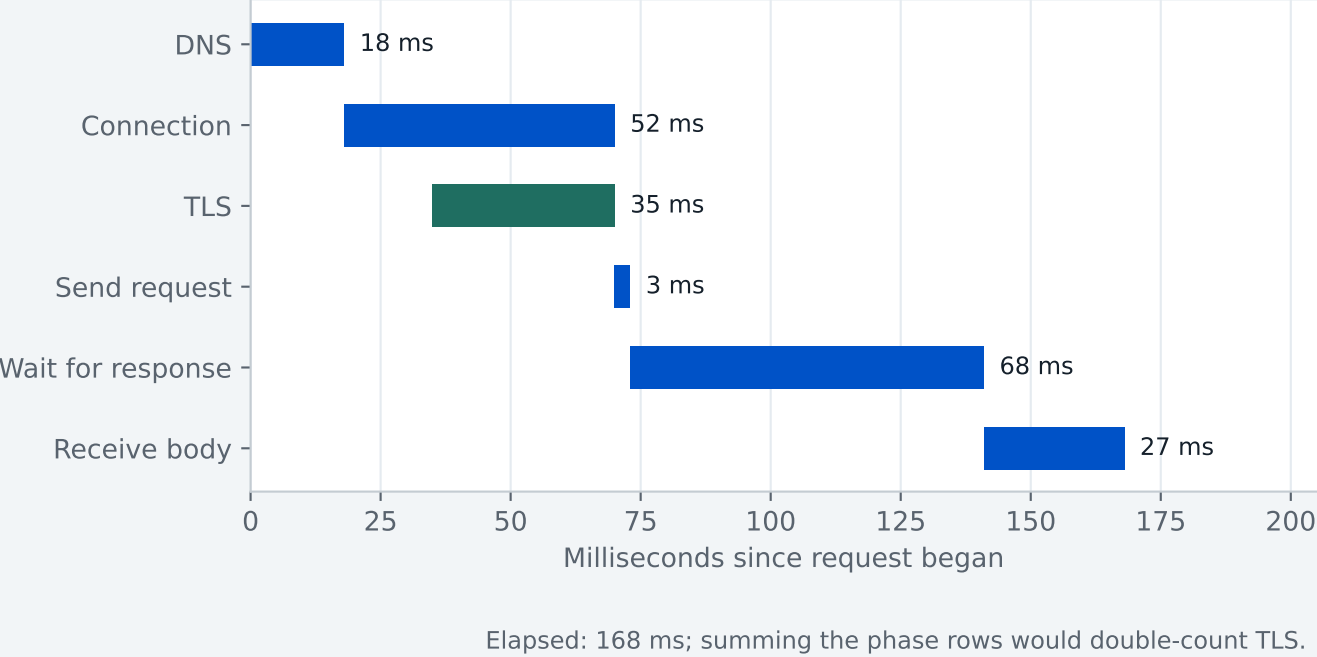

01 NFC capacity

A known amount inside a reported capacity

02 Request waterfall

Intervals share one clock; TLS is inside connection time

03 Cellular observation and forecast

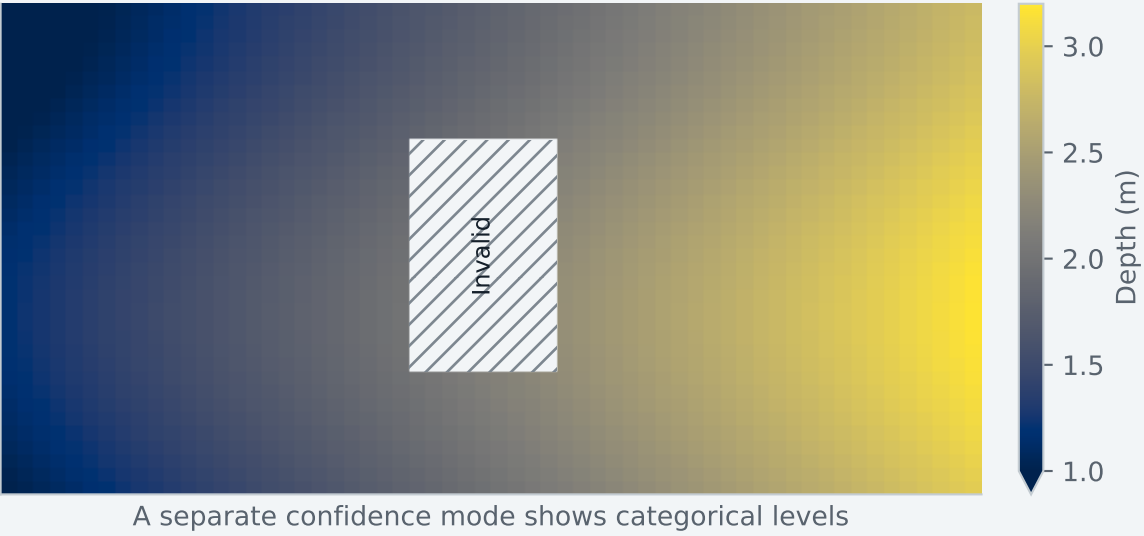

A future interval never masquerades as a measured trace

Reported LTE/5G and delayed reception histograms get separate tracks.

04 Depth and uncertainty

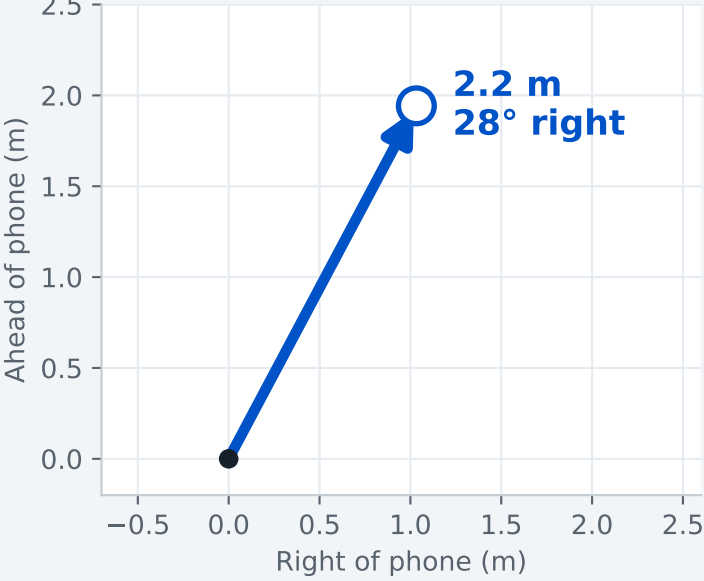

Ordered distance colors; invalid samples remain visibly absent

Pixel confidence is not a calibrated percentage or a mesh error bound.

05 Nearby-device direction

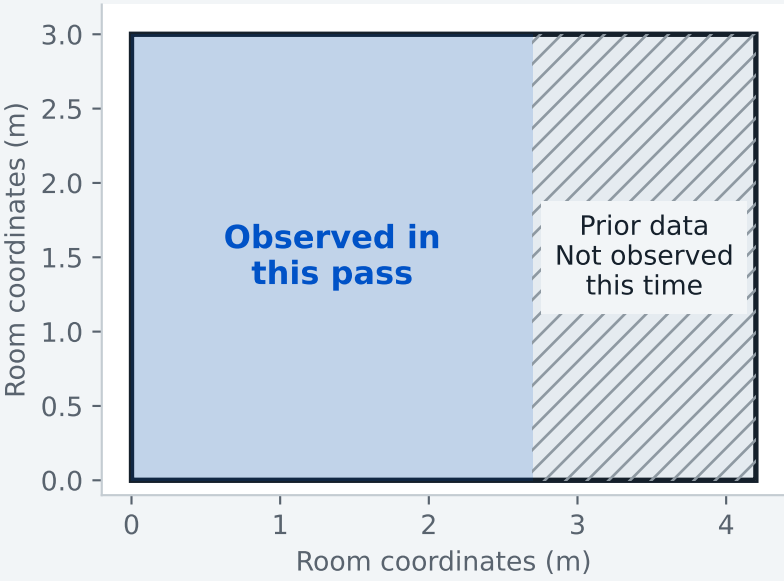

Direction and distance are distinct available measurements

Without valid direction: keep range, remove the arrow.

06 Room coverage between passes

Not observed this time does not mean physically removed

Coverage is illustrative; no real room or scan is represented.
